CLAIM(S)

What is claimed is:

- A copper-based electrode powder, comprising:
 copper powder;
 cuprous oxide powder; and
 lead germanate glass powder.
- 2. The electrode powder of claim 1, wherein the electrodepowder comprises 84-100% by weight of the copper powder.
 - The copper-based electrode powder of claim 2, further comprising:

 nickel powder in an amount of up to 1% by weight of the copper powder.
 - 4. The electrode powder of claim 1, wherein the electrode powder comprises less than 10% by weight of the cuprous oxide powder.
- 5. The electrode powder of claim 1, wherein the electrode powder comprises less than 5% by weight of the lead germanate glass powder.
- 6. The electrode powder of claim 1, comprising:
 at least one of barium, strontium, calcium, magnesium,
 manganese and zinc.
 - 7. The electrode powder of claim 1, comprising: at least one of silicon, zirconium, tin or titanium.
 - A screen-printing copper electrode composition, comprising: the powder compositions of any of claims 1 through 7 dispersed in an organic vehicle.
